DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-23 have been rejected under 35 U.S.C. 103(a) as being unpatentable over non-Patent literature reference, Gram Faceting Designs (GFD) in view of Grossbard, 4020649. GFD discloses a mixed cut diamond (step cut on the crown and brilliant cut on the pavilion. GFD's stone is octagonal in shape with corner crown lengths equal to corner side lengths and four table corner lengths equal to four table side lengths. The pavilion has a culet point with eight rib lines extending in a straight line from the girdle to the culet. The crown also comprises at least two steps with a flat table (see annotated figure). The number and shape of the facets on the pavilion as defined in the claims are shown in GFD.

Art Unit: 3677

The claims recite that the corner lengths of the crown and table are substantially less than the side lengths of the crown and table. GFD discloses the lengths to be the same.

Grossbard, 4020649, discloses a mixed-cut gemstone having corner lengths less than the side lengths of the table and crown.

The courts have noted that matters relating to ornamentation only, which have no mechanical function, cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947).

The shape of the stone is considered to be ornamental and serves no mechanical function. Therefore, it would have been an obvious design choice to make GFD's stone into the shape of Grossbard's stone in order to change the aesthetical appearance of the stone.

3. The declaration under 37 CFR 1.132 filed 3/12/2008 is insufficient to overcome the rejection of claims 1-23 based upon GFD in view of Grossbard as set forth in the last Office action because: The supplemental declaration by Detra Segar has not been found to be persuasive to overcome the rejections. The declaration has failed to show that the claimed gemstone is the reason for the success of the jewelry line. It broadly states that the jewelry pieces include a unique mixed cut gemstone having a step cut crown and a brilliant cut pavilion in a certain arrangement, but fails to state that it is the claimed gemstone. It also states that the LUCIDA jewelry line has enjoyed significant commercial success. Does this line of jewelry only include the claimed gemstones? The declaration is lacking specifics and details of the type of gemstones sold, the amount, the marketing budget compared to other lines, etc. Details of the conclusions must be submitted for the office to make an evaluation of the evidence.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
